

Lab 2

DATA 422: Advanced Data Science Methods and Ethics

Ungraded. **Paper quiz** Friday from the [Quiz 2 study bank](#) (this lab + Ch. 2-3).

Open in Colab

[Open in Colab](#)

Notebook: [lab-02.ipynb](#). CPU runtime.

What you will do

1. Tiny next-character LM (Karpathy loop) — **not** the insurance model.
2. **JIT**: object-oriented Python for `nn.Module` (`class`, `self`, `super()`, `forward`).
3. RiskMLP shapes, parameter count, tiny-batch overfit.

Exercises print a **desired** shape, count, or accuracy so you can self-check.

Project (separate)
