

Textbook and readings

- Andriy Burkov, *The Hundred-Page Language Models Book* (free online). Chapters are assigned on the [schedule](#).
- Selected [Karpathy Zero-to-Hero](#) clips in weeks 1–2 (tiny autograd / makemore / GPT).

Computing — Google Colab

Labs run in [Google Colab](#) with your **Cal Poly Humboldt Google account**. Colab already has **PyTorch**.

Each [lab](#) page has an **Open in Colab** badge and the `.ipynb` file. Notebooks are copied to the public [course GitHub repo](#) when the site is published so Colab can load them (the private source repo is not accessible to Colab).
